NOTES	19
STATISTICAL SUMMARY	20

Labour force (page 5)

The seasonally adjusted unemployment rate rose 0.3 percentage points to 9.2 per cent in October 1993. The trend estimate of the unemployment rate decreased by 0.1 percentage point to 9.0 per cent. The seasonally adjusted number of persons unemployed increased by 1,900 to 80,100 while the number of persons employed decreased by 800 to 795,500.

Western Australia's participation rate continued to remain the highest of all the states, steady at 65.6 per cent in October 1993.

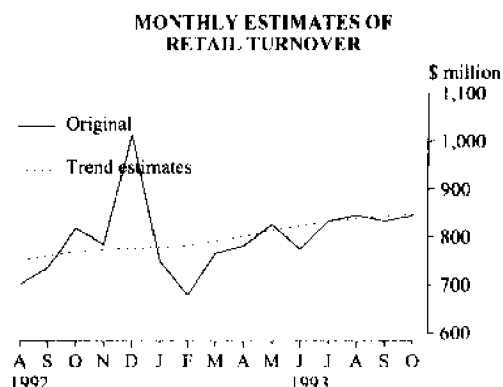

Retail (page 16)

Estimated turnover of Western Australian retail establishments during November 1993 was \$867.1 million (at current prices), an increase of 2.7 per cent over the previous month. The trend estimates show an increase of 0.2 per cent over the previous month.

The trend estimates indicate a national annual growth rate of 4.4 per cent from November 1992 to November 1993. The annual growth rate for Western Australia for the same period was 9.5 per cent.

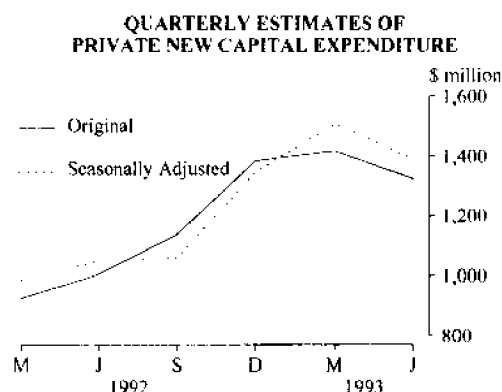

The national trend estimates show increases of 0.5, 0.6 and 0.6 per cent for the months of September, October and November 1993. For the same three months Western Australia recorded increases of 0.5, 0.4 and 0.2 per cent.

New Capital Expenditure (page 13)

Estimated private new capital expenditure for Western Australia during the June 1993 quarter was \$1,325 million at current prices, a decrease of 6.6 per cent from the previous quarter. The seasonally adjusted current price estimates show a decrease of 7.8 per cent from the previous quarter.

Comparison of the original series for the six months ending June 1993 with the same six months of 1992 shows that Western Australia recorded an increase of 42.0 percent. In the same period the national total increased by 8.8 per cent

INFORMATION CONSULTANCY

IN ANY TYPE OF BUSINESS, ACCURATE AND
UP-TO-DATE INFORMATION IS A KEY SUCCESS FACTOR.

THE ABS CONSULTANCY SERVICE CAN FIND
THE RIGHT INFORMATION FOR YOU

Key features of our Consultancy Service are:

- * **expert advice**
- * **accurate information**
- * **personalised service**
- * **timeliness**
- * **professional quality**

Data are provided in the format of your choice:

- * **hard copy (mailed or faxed)**
- * **computer diskette or**
- * **a personal phone call**

To contact the Information Consultancy Service

(a) The ABS has undertaken a review of the Price Index of Materials Used in Building Other than House Building (OTHB). The reference base for the indexes has been updated to 1989-90 = 100.0 as a result of this review. Also, the previous OTHB was classified according to the Australian Standard Classification (ASIC), which has now been replaced with the Australian & New Zealand Standard Industrial Classification (ANZIC). Further information about the review is detailed in Publication 6407.0 Appendices A & B.

To order the reference publications, contact Information Services on (09) 323 5140. For further information on the CPI, and building materials price indexes, contact Robin Dalby on (09) 323 5149.

(a) Excludes motor vehicle dealers, petrol stations, etc. (b) Includes butchers, bread, cake and take-away stores.

Seasonally adjusted and trend estimates

Seasonal adjustment is a means of removing the estimated effects of normal seasonal variation from the series so that the effects of other influences can be more easily recognised.

In the seasonal adjustment of the turnover estimates, account has been taken of both normal seasonal factors and "trading day" effects (arising from the varying length of each month and the varying numbers of Sundays, Mondays, Tuesdays, etc. in the month). Seasonal adjustment does not remove from the series the effect of irregular influences (e.g. abnormal weather, industrial disputes) and the seasonally adjusted estimates still reflect the sampling and non-sampling errors to which the original estimates are subject.

The smoothing of seasonally adjusted series to create trend estimates is a means of reducing the impact of the irregular component of the series. The trend estimates are derived by applying a 13-term Henderson-weighted moving average to the respective seasonally adjusted series. These trend series are used to analyse the underlying behaviour of the series over time. While the smoothing technique enables estimates of trend to be produced for the latest month, it does result in revisions to the estimates for the most recent months as data for subsequent months become available. Generally subsequent revisions become smaller and after 3 months have a negligible impact on the series.

NOTES

ABS products and services

The *Catalogue of Publications and Products* (Catalogue No.1101.0) (issued by the Australian Bureau of Statistics, Canberra) details all publications produced by the ABS, and is available from any ABS Office.

2. The ABS can also provide some data in one or more of the following forms:

Microfiche
Magnetic tape
Computer printout
Electronic media
Photocopies
Clerically extracted tabulations.

Inquiries about these services can be made by contacting Information Services on 323 5140.

Symbols and other usages

3. The following symbols, where shown in columns of figures or elsewhere in tables, mean:

- n.a. not available
- n.e.i. not elsewhere included
- n.p. not available for separate publication
(but included in totals where applicable)
- n.y.a. not yet available
- nil or rounded to zero
- .. not applicable
- p preliminary -- figure or series subject to revision
- r figure or series revised since previous issue
- break in continuity of series (where drawn between two consecutive figures or columns)
- ** the estimates in this table or series are based on information from a sample survey and are subject to sampling variability
- * very small estimates are subject to high standard errors (relative to the size of the estimate) which detracts seriously from their value for most reasonable uses. These estimates, preceded by an asterisk, should be used with caution.

4. Where figures have been rounded, discrepancies may occur between sums of the component items and totals.
